1.	The 105 (not 150) mm guns delivered from the Soutet Water Control of the Soutet Water	
1.	The 105 (not 150) mm guns delivered from the Soviet Union for installation in tanks lie at Kirchmöser. They are installed for the most part in type Stalin I tanks, but they have also been installed in three of the improved T-34 tanks. The tanks belong to an armored division at Jena. These T-34 tanks, along with the guns, received new turrets, delivered by Krupp Gruson of Magdeburg. The 105 mm guns are provided with muzzle brakes and about 4.5 meters long. In addition, the turret has an outward tangents while which
